

Hanut India: 2U Server Chassis

Hanut India: 2U server chassis is an ideal chassis for building dense 19inch rack optimized Intel Pentium 4 based servers and workstations.

Key features:

► Standard based design

Hanut 2U server case accepts standard and readily available system components like ATX & micro-ATX motherboards, Intel Pentium 4 & Celeron processors, IDE hard disk drives, 80mm DC12V chassis cooling fans etc.

Standard based design enables easy maintenance and up-gradation and wider choice of components like motherboards, power supplies etc. in comparison to server cases with proprietary designs and constructions.

► Rugged construction & quality assurance

Chassis body is made from heavy-duty galvanized sheet steel and is powder coated. Chassis body is thus well protected from protected against corrosion.

The 2U chassis are manufactured in India by Hulasi Metals Pvt. Ltd. (HMPL) - an ISO 9001: 2000 certified manufacturer with modern hi precision Japanese production machines.

► Excellent ventilation and heat dissipation

Two 80mm Spire [™] ball bearing fans along with front to rear air flow design of the Hanut server chassis provide excellent ventilation and heat

dissipation. Hanut India offers 1-year replacement warranty on its server chassis cooling fans.

► **Easy to use computer server chassis**

Simple to open and close top cover
Informative front control panel
Removable disk drive cage
Adjustable 4 post rack mounting brackets (standard)
Adjustable sliding rails pair for 19" rack installation [Optional]
I/O shield cut out as per ATX form factor specifications

► **Server grade power supplies**

The quality of power supply used plays an important part in deciding overall server uptime and reliability. Hanut India offers server grade long life ATX12V and EPS12V power supplies for its 2U server chassis.

Hanut India 2U server chassis: Technical Specifications	
Construction	Heavy duty galvanized sheet steel body
External finish	Black powder coat finish
Disk drive space	1 Floppy disk drive 1 Front accessible 5 1/4" drive bay 2 Hidden 3 1/2" drives
Cooling Fan	Two 80mm DC12V Spire (tm) ball bearing fan
Controls	Power On/Off, Power reset
Status Indicators	Power On, HDD activity
Dimensions	88mm High x 427mm Wide x 615mm Deep
Motherboard	ATX specification version 2.1 Micro-ATX specification version 1.1
Power supply	ATX12V / EPS12V power supplies in 2U size

Dimensions exclude 19" rack mounting brackets of the server case.

Hanut 2U server chassis are the right base for building dense 19 inch rack optimized Intel Pentium 4 based servers and workstations.
