

Hanut Premium Extra Wide Networking Racks

Hanut Premium Extra Wide Networking Racks

[Cable management facility] Hanut premium quality extra wide 19" networking racks are 800mm wide. They are 200mm wider than Hanut 19" Server Racks. The extra width is used for offering 4 full length vertical cable channels. These full length integrated vertical cable channels make systematic routing of large number of data cables possible.

[Special] 50% Space Saving Split Doors

In comparison with normal single section doors Hanut SPLIT doors require 50% less space to open. Hanut SPLIT doors save you precious IT room / datacenter floor space.

In addition to saving space Hanut SPLIT doors look great. They have secure 2 point locking arrangement with quality swing lock.

[Sturdy construction] The basic frame is made from 2mm CRCA steel and is MIG Welded for rock solid strength and rigidity.

[Standard configuration] of Hanut extra wide networking rack is

42U Height* 800mm Width * 800mm Depth
Space saving Split toughened glass front door
Space saving Split "Airmax" rear door
