

Hanut 2@1 Wall-mount Cabinets

Get the benefits of double section cabinets @ prices single section cabinets

► Observations and feedback given by leading network integrators of Punjab

We have come across many cases where the local (generic) wall mount cabinets were unable to properly accommodate switches and/or routers of top companies like Avaya and Cisco, because of their non standard and inflexible mounting rails.

Also because of shallow depth provided by these local (generic) wall mount cabinets we had problems in closing their front doors with some Cisco routers kept inside them.

We have been using Hanut 2@1 wall mount cabinets for quite some time now. We have faced no such problems with Hanut 2@1 wall mount cabinets.

We are very happy with the prices and features & benefits mix offered by the Hanut 2@1 wall mount cabinets.

► Observations and feedback given by leading network integrator of Raipur

I bought yours 6U wall mount cabinet. I found its quality to be excellent. I will now be buying Hanut wall mount cabinets and floor standing 19" server racks.
